from the Savannah River Site

Hazardous Waste Permit Application Modification Request

The U.S. Department of Energy (DOE)-Savannah River Operations Office has requested from the South Carolina Department of Health and Environmental Control (SCDHEC) modifications to Savannah River Site's (SRS) 1992 Resource Conservation and Recovery Act (RCRA) Part B Permit Renewal Application for Volume IV, which details operations at the F-Area Hazardous Waste Management Facility (HWMF), and Volume V, which details operations at the H-Area HWMF.

The revisions (Rev. 11 for Volume IV and Rev. 12 for Volume V) add beryllium to the F-Area Groundwater Protection Standards List, revise the Phase I treatment standards to be consistent with the underground injection control permit, revise the reporting requirements, and reduce the number of groundwater monitoring wells.

This notice begins a 60-day comment period for both modifications. More information, including the actual permit applications, is available for review and copying at the DOE Public Reading Room located in the University of South Carolina-Aiken library, or by contacting personnel listed in this notice. The permittees' compliance history during the life of the permits being modified is available from the Agency contact person.

A public meeting will be held September

14 at 3:00 p.m. at the Aiken County Public Library. Representatives from SRS will be available to answer questions. Written comments may be sent to SCDHEC. All comments will be considered in the final decision.
